## Business Applications

- Small – Medium businesses with 20-200 employees that require data & voice services
- Businesses in metered markets that make a significant amount of local calls
- Businesses looking to take advantage of a low cost per minute savings on long distance calls
- Businesses that want to benefit from the savings of having a single circuit over multiple circuits
- Businesses that do not require a full T1 of Dedicated Internet Access, but do use the web for email, web browsing, product research, etc.

## Robust Network

Matrix Integrated-T is available in most major metropolitan areas and is carried over Tier 1 sets of networks in the industry. The Matrix Service Network utilizes the power and technology of some of the largest and most highly regarded carriers ensuring customers will always receive optimum network security and 99.999% availability.

## Matrix Advantage: The Power of One

Matrix Business Technologies is a recognized leader in premier voice, data, and Internet solutions specifically designed to help growing businesses achieve optimum results. The Matrix Advantage is unmatched, offering The Power of One:

- One Provider to bundle services and maximize savings
