For add on sales to existing customers credit shall be the incremental Monthly Recurring Charge. **TWO FREE MONTHS:** Customer will receive a one-time credit issued on month 13 and month 25 of the three-year contract (Max value \$5,000 per credit) and will be equivalent to Monthly Recurring Charge or contracted Minimum Usage Guarantee (Max value \$5,000) for new customers. For add on sales to existing customers credit shall be the incremental Monthly Recurring Charge or contracted Minimum Usage Guarantee (Max value \$5,000) increase. Offer valid for current Matrix customers in good standing and new customers subject to credit approval. Matrix reserves the right to discontinue or suspend promotional offer at any time. Not available in all areas. Some restrictions may apply. Void where prohibited.

# Matrix SelectONE Business Broadband

**Lightning-fast Internet Access With The Right Bandwidth For Your Business Needs!**

## Access Types

Matrix SelectONE Broadband services deliver high-speed internet access suited to your business needs and budget. SelectONE Broadband connections offer Tier 1 ISP connectivity over a nationwide access footprint with the same pricing in all locations. In addition, every SelectONE Broadband product comes complete with a router installed in your premises and a FREE option for all customer premise equipment needed to connect your local area network to the Internet\*.

### Dedicated Internet Access

SelectONE Broadband Internet traffic traverses the Internet via Tier 1 ISP peering points, providing the fastest and most secure Internet service available. SelectONE Broadband products are suited to your needs, whether you're operating a home office requiring basic Internet access for email and general Web browsing, a central business location accessing mission-critical applications via an Internet connection or anything in between.

### Uniform Nationwide Pricing

Each SelectONE Broadband access type and speed option has its own price point that is the same regardless of the location. So a SelectONE Data T1 1.5 Mbps purchased in New York is the same price as one purchased in Los Angeles. In addition, all promotions, discounts, etc. apply equally regardless of the circuit's location. For multi-location operations, this drastically simplifies the purchasing and management of data services.

#### • SelectONE Data T1:

Choose SelectONE Data T1 for high-capacity, high-reliability situations in which a Service Level Agreement is a must. Select from Cisco, Netopia and EdgeMarc router options as appropriate for your location and current infrastructure (charges will apply to some router options). All SelectONE Data T1s are true T1 circuits delivered over four-wire loops and are backed by a dedicated support and repair organization. SelectONE Data T1 is available in the following speeds:

- 3.0-6.0 Mbps Bonded T1
- 1.5 Mbps Full T1
- 768 Kbps Fractional T1
- 384 Kbps Fractional T1

#### • SelectONE Business DSL:

Choose SelectONE Business DSL for your branch office, retail location or as the main data connection for your small business. All SelectONE Business DSL circuits are delivered over a dedicated circuit, provide symmetric upstream/downstream bandwidth and are certified at the link speed that is ordered. SelectONE Business DSL is available in the following speeds\*\*\*:

- 1.5 Mbps
- 1.1 Mbps
- 768 Kbps
- 384 Kbps
- 192 Kbps
- 144 Kbps

#### • SelectONE SOHO ADSL:

Choose SelectONE SOHO ADSL for basic internet access needs, including general Web browsing and email access or certain branch location applications (e.g., POS systems, credit card authorization, etc.). Bandwidth on SelectONE SOHO ADSL is asymmetric, with download speeds several times higher than upload speeds, enabling rapid downloads of large files and access to streaming media. SelectONE SOHO ADSL is available in the following speeds\*\*\*:

- Up to 15 Mbps / 1 Mbps Dedicated Loop (Downstream/Upstream)
- Up to 10 Mbps / 1 Mbps Dedicated Loop
- Up to 6 Mbps / 768 Kbps Dedicated Loop
- Up to 6 Mbps / 768 Kbps Line Split
- Up to 3 Mbps / 768 Kbps Dedicated Loop
- Up to 3 Mbps / 768 Kbps Line Split

\*Requires minimum contract term and/or rebate processing  
\*\*On SelectONE SOHO ADSL Up to 3 Mbps / 768 Kbps, requires minimum contract term  
\*\*\*Speeds available depend upon facilities at each location, not all a speeds available at all served locations
