

MATRIX T-1 VELOCITY™

FUEL YOUR BUSINESS GROWTH WITH A HIGH-PERFORMANCE DIGITAL MATRIX VOICE-T!

Matrix Voice-T delivers a flexible, cost-effective solution that offers increased trunking efficiency and supports advanced calling features – over your existing infrastructure. Whether you need a traditional telephony solution or want back-up to your mission critical networks, Matrix Voice-T comes with all the features and functionality you need, all for one competitive price.

- **FREE** Unlimited Local Calls!*
- **500 FREE MINUTES** IntraLATA toll*
(per channel)
- **FREE** Customer Premise Equipment!*
- **INCLUDES** Loop and Demarc Extension!*
- **AS LOW AS \$498/month!****

Enhance Your Network

- Use your existing infrastructure to enable all digital communication
- Allocate channels to adapt to changes in traffic patterns
- Implement a cost-effective, robust disaster recovery/back-up solution to protect mission-critical traffic

Advanced Features

- Free minutes included, depending on solution selected
- Calling Line ID — Automatically match calling party information with internal databases
- Out-of-Band Signaling — Enhance efficiency by handling all signaling from a separate D channel (PRI only)

- Non-Facilities Associated Signaling — Control multiple ISDN PRI lines via one D channel
- Back-up D Channel — Add redundancy by using a spare D channel to back up call signaling for ISDN connections

Product Specifications

Traditional (Non-PRI)

- EM Wink
- Loop Start
- Local, Long Distance, and Toll Free
- Caller ID Options:
 - Hard-Coded ANI
 - Custom ANI Delivery

ISDN PRI (23B + 1D channel)

- Support FAS (Facility Associated Signaling) and NFAS (Non-Facility Associated Signaling)
- Back-Up “D” Channel
- Local, Long Distance, and Toll Free
